## Summary

---

I've been programming since my 13. I love to learn new programming languages and frameworks and use them for creating clean and maintainable software applications. Furthermore, I love to follow open source community and learn new thing from there to improve my programming skills. You can see all related projects inside my [GitHub](#) account.

## Personal Projects

---

### 1 - [Personal Collection Web App](#)

- Programmed Web Application which allows users to create update and maintain collections and his custom fields.
- Implemented Authorization using PassportJs and Google auth api.
- Designed RESFULL API using MVC pattern for saving collections and user information's to SQL database.
- Designed database schemas and tables using database normalization (4NF).
- Stack : React-NodeJs -MySQL (ORM sequelize)

### 2 - [Recipe application WPF](#)

- Programmed Windows Desktop Application using WPF.
- Implemented MVVM pattern for maintainability and further changes.
- Programmed backend logic for saving recipes and user information's to database(SQLite).
- Implemented logic that allows you to save recipes as PDF file.
- Stack - C# - .NET(WPF) - SQL

### 3 - [Movie Shower Application](#)

- Developed Front End movie shower application.
- Accessing to public API using AXIOS.
- Implemented Responsive Design for web and mobile using CSS framework SASS.
- Stack : Typescript - React - Sass

### 4 - [FullStack REST API](#)

- Developed FullStack Web API using golang gin framework.
- Authentication using JWT and Google auth api.
- Implemented MVC Pattern.
- Saving user and post information to PostgreSQL database.
- Implemented middleware to decode and save image to local and PostgreSQL database.

## Education

---

**IT Academy Step | Georgia, Tbilisi**

**Software Enginner | 10/2022**

Learning IT essentials and programming for 2 year with professional teachers.

**Tbilisi High School | Georgia, Tbilisi**

**High school diploma | 07/2022**

High school diploma in Georgia (Tbilisi)

**CISCO | Georgia, Tbilisi**

**CPA (C++ Certified Associate Programmer Certification) | 04/2022**

Essentials in C++ and OOP

**CISCO | Georgia, Tbilisi**

**Comp TIA A+ Certification | 03/2021**

IT Essentials Program provided by CISCO under control of professional teachers.

## InternShip

---

### Internship software developer at Itransition

- Learned how to write and maintain clean project code under control of mentors.
- Learned SOLID principles and OOP and how to use them inside project.
- Implemented and created full stack web applications using JavaScript and .Net under the direction of Senior Software Developers.
- Worked with teammates using version control system(git).

## Skills

---

Typescript, Javascript, React, NodeJs, C# .NET, SQL/NOSQL, GIT, Linux, Docker, Golang, C/C++

## Languages

---

English, Russian, Georgian, Azerbaijani, Turkish
